

PRODUCT BULLETIN: PSP100-008

SORBENT ROLL, HEAVY WEIGHT, OIL ONLY, DIMPLED

1 roll per bag, 30" x 150'

Dimpled meltblown polypropylene sorbents are most commonly used to skim oil off of water. Their fibrous texture draws hydrocarbon-based fluids into the center of the pads and/or rolls while repelling water.

Rolls are used when undetermined lengths of material are needed or when dragged across a spill to remove the final sheen.

These sorbents are untreated (no additional chemical additives). Untreated polypropylene is hydrophobic (repels water) and oleophilic (adsorbs oil). Polypropylene fibers do not "absorb"; oil actually 'adsorbs' (adheres) to the fibers.

Part Number: PSP 100-008

Colour: White

Qty: 1 roll per bag

Weight (approx.): 23 lbs (10.4 kg)

Size: 76 mm high x 46 mm dia

Packaging: Clear Plastic Bag, Label

Application Guide:

This type of product is commonly used for everyday maintenance applications for manufacturing / production facilities, or for marine spill response. A perforation helps reduce waste.
